Document Toolbar

Code View: View or edit the page in HTML.

Split View: View the page in HTML code and Design view (WYSIWYG) at the same time.

Design View: View or edit the page in the WYSIWYG (What You See Is What You Get) editor.

Live Data View: View dynamic data

Title: Page Title Type the Web page title without using the Page Properties dialog box. The title appears in the title bar of the browser.

File Management: Have easy access to files already published, or upload files directly from the document window.

Derivity: Choose from a list of browsers installed on the computer to preview the page.

C Refresh: Click to update changes made to the page while working on the HTML code.

Reference: Click to view the definition of the current tag in the Reference panel.

D. Code Navigation: Click to view the definition of the current tag in the Reference panel.

View Options: In Design view, turn visual aids off or on such as table borders, or apply a grid or ruler to the page. In Code view or the Code Inspector, change how the HTML code is displayed.

Property Inspector

General Commands

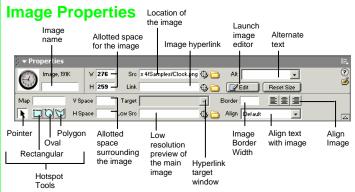

- Select an item to view its properties.
- To Get Help: Click the Help button for more information on options.
- Format Text in HTML Code: Click the Quick Tag Editor button to apply an HTML tag to selected text or object.
- To Expand/Contract the Property Inspector: Click the Expander arrow in the lower right corner to view or hide all the options in the Property Inspector.

- **To Format Text:** Select the text and apply formatting from the Property Inspector.
- To Create a Hyperlink: Select the text and type the URL in the Link textbox; or drag the Point-to-File icon to the file in the Site window; or click the Folder icon to browse for a file in the Web site.
- **Specify Link Target Frame:** Specify in which frame the hyperlink should appear.

- To View Table Formatting: Click the Apply button in the Inspector.
- To Add or Delete Rows or Columns: Type the number of rows or columns you want to add or delete in the Rows and Cols text boxes.
- To Change Table Width or Height: Type a number in the <u>W</u> or <u>H</u> text boxes.
- To Display the Table in Pixels or Percent: Click the pixels or percent list arrow for the Rows or Columns and select the display option.
- To Add Cell Padding or Cell Spacing: Enter the amount in the Cell<u>P</u>ad or Cell<u>Space text boxes.</u>
- To Add a Table Border: Enter the amount in the Border text box.
- To Add a Background Color: Click the Bg Color list arrow and select a color from the palette.
- To Add a Border Color: Click the Brdr Color list arrow and select a color from the palette.
- To Add a Background Image: Type the location in the <u>Bg</u> text box, or drag the Point-to-File icon to the file in the Site window; or click the Folder icon to browse for a file.
- To Add a Table Border: Enter the width in the Border text box.

- To Add a Hyperlink to an Image: Select the text and type the URL in the Link textbox; or drag the Point-to-File icon to the file in the Site window; or click the Folder icon to browse for a file in the Web site.
- To Create an Image Map: Select the Rectangular, Oval, or Polygon Hotspot Tool, draw a shape and set the link location.
- **To Edit an Image:** Click the Edit button to launch the default graphic editor program on your computer.
- To Align an Image: Click the Align list arrow and align the image relative to text nearby; or click the Left, Center or Right Align button in the Inspector.
- To Insert an Image: Press <Ctrl> + <Alt> + <l>, or select Insert → Image from the menu.

Panels

- **To View or Hide a Panel:** Select **Window** from the menu bar and select the panel you want to view or hide. Or, click the panel group and select the panel tab you want to view.
- To View or Hide Panel Groups: Click the Panel group Expander arrow between the document window and the panel groups.
- There are six panel groups, and a total of 19 different panels available in Dreamweaver:

Design

CSS Styles: Apply CSS styles to the current selection HTML Styles: Apply HTML styles based on other HTML tags to the selection Behaviors: Attach and modify behaviors to specific page elements, specifically HTML tags

Code

Code Inspector: Work on the page in HTML code; just like Code view but in a separate window

Snippets: Create, delete, edit, or insert code snippets in the document Reference: View detailed information about the HTML tag you're working on

Application

Databases: Create and inspect database connections, insert database code Bindings: Locate and insert dynamic content

Server Behaviors: Create, insert and edit server behaviors into the page Components: Create, inspect, and insert components or component code

Files

Site: Track local and remote files, and upload files on the Web Assets: View and insert site assets such as images, HTML colors, links, Flash movies, scripts, templates, and library items

Answers: Get answers to questions about Dreamweaver MX

Others

Code Inspector: Work on the page in HTML code; just like Code view but in a separate window

Frames: View a representation of the frames that make up the page History: Replay or Undo steps already performed in Dreamweaver Layers: Manage the layers in the page

Sitespring: Web development collaboration feature

Timeline: View the properties change in layers and images over time
